

# You need medical records *fast* so you can settle cases quickly.

But your staff winds up spinning in circles finding the right contacts, updating forms, sending payments, following up on progress *and coming up empty-handed for months.*

## Show your team an easier, faster way.

We've provided hundreds of law firms with quick, easy access to complete medical records while freeing their staff to focus on more valuable work.

*"We chose Record Retrieval Solutions based on feedback from colleagues about their speed, accuracy and fair pricing model. They are by far the best, most efficient, and most economical medical record and billing retrieval service I have used in nearly 30 years of legal practice. RRS frees up time for us to handle the more important and significant aspect of cases."*

~John C Miller, Jr. , Miller Injury Attorneys

## Simply tell your staff to:

- 1) Send all medical records requests to us.
- 2) Go do more important work.

Records are delivered in an average of 10 days and quality checked for completeness and accuracy. Meanwhile, you gain hours of increased staff productivity.

## A Smart Cost Solution

- Simply pay a fixed flat fee of just \$35 (plus provider/copy service fees) for each request. Then recoup our fee as a case expense.
- We also offer indexes, summaries, Bates labeling, and more!
- We never gouge clients for services they don't receive, like the fees other services tack on for "copies" of electronic records that actually cost nothing to replicate.
- We strictly adhere to all HIPAA regulations and have established advanced security protocols for all online activities.
